

Name of Event: Design Vying

Event Description:

A real time problem statement will be given with some conditions and it should be solved/designed in your style using STAADPRO or ETABS.

Guidelines:

- In this competition participant will be given a particular problem statement on spot which should be executed in STAADPRO or ETABS only.
- Participants should design the given question (problem statement) within the stipulated time.
- The Screenshots should be converted into a single pdf and submitted in the provided google form.
- The participant should also write a brief description about the designed structure in the Google Form.
- He/she will be disqualified if caught in any malpractice.
- Example Question: Design a G+7 tapered structure in 4500sq.feet. Considering the Live, Dead and Wind load according to the IS codes.
