

## Parents & Teachers Meet

Department of Civil Engineering organized a Parents & Teachers meet on 11<sup>th</sup> of October 2014 from morning 10<sup>o</sup> Clock in Peacock Hall at KL University. Approximately 80-90 parents attended this meeting, which lasted for about 3 hours.

Dr. Shashi Kumar Gupta, the HOD, welcomed all the parents to the Parent's Teacher meet and presented a brief introduction of the Civil Department. He also highlighted the recent successes of KL University in terms of Placements and students performance in games at National and International levels, where the students brought laurels to the KLU.

After the HOD Presentation, Parent's were given opportunity to speak and express their views to the audience which started a interactive dialogue between the parents and teachers. The parents were highly appreciative that the department is sending them the letters showing their wards performance and attendance. They also were happy to come all the way to KLU to share their views and talk to the counselor of their wards.

After speaking from the dais the parents interacted with the respective faculty members, year coordinators and discussed the observations made by the respective teachers on the counseling sheets etc.

Some parents expressed the view that their wards should not be taught inter-department subjects but the focus of the training should be limited to core civil eng subjects only. This issue was discussed at length, alongside other requests of the parents on improvement of food quality in hostel and transportation arrangement etc.

By and large the meeting went very well and was a big success.
