Dear All,

For your information that,

In the present scenario, without devices; imagine your life...

With a single device (Mobile Phone) all are enjoying multimedia communications, which comprises different standards and technology. As an Engineering Graduate, the students have to understand how those devices are working, how they are exchanging data between them and communicating between them, what are the technologies (protocols) behind that, different addressing concepts involved and so on...

... All these questions are addressed by this workshop with Hands-on Practice

About Workshop

- The aim of this workshop is to deliver the fundamental concepts of Routing and Switching concepts in Data Communication and Networking.
- Computer networks allow the user to access remote programs and remote databases either of the same organization or from other enterprises or public sources. Computer networks provide communication possibilities faster than other facilities.
- This workshop briefly expounds the booming expertise of Communication & Networking and interconnection of network nodes with simulation.
- To introduce IEEE standard employed in Networking.
- To make students familiarized with different protocols, network components and their functionalities.
- Hands-on labs and Cisco Packet Tracer simulation-based learning activities help students develop critical thinking and complex problem-solving skills.
- Upon completion of this workshop, the students will gain comprehensive understanding of Role of Intermediate devices (Switches and Routers) and their functions in layered structure with different layers of protocols in Packet Tracer simulation.

About Cisco Packet Tracer

- Cisco Packet Tracer is a powerful network simulation Tool that allows students to experiment with network behavior and ask "what if" questions. As an integral part of the Networking Academy™ comprehensive learning experience, Packet Tracer provides simulation, visualization, and authoring, assessment, and collaboration capabilities and facilitates the teaching and learning of complex technology concepts.
