

Core Text Book Collection

The University offers under graduate and post graduate courses in different subject fields including civil, computer science, electrical and electronics, electronics and communications, electronics and computers, mechanical, petroleum, biotechnology in engineering; atmospheric science, chemistry, commerce, English, engineering science, mathematics, and physics in science and humanities; Law; pharmacy; business administration; and undergraduate in architecture, arts and media studies, and hotel management. Covering the syllabi of these courses and prescribed educational material to cater to the needs of students the library holds more than 27,500 text book titles in multiple copies. The heavily used titles are purchased more in numbers.
