Databases

In addition to more than 21,000 E-journals, KL University also subscribes to the following databases to provide comprehensive access to various resources like articles, books, e-books, conference proceedings, financial and business information, manuals, reports, standards, and so on. These include:

ASTM Digital Library provides comprehensive coverage to bulletin, data series, journals, manuals, materials research and standards, proceedings, and special technical publications. The resource is subscribed from 2012.

CMIE Prowess covers financial performance of Indian companies and is accessed through a specially developed software. Annual Reports of individual companies is the principal source for this database. The database covers listed and unlisted companies. For listed companies, the database includes data sourced from the stock exchanges. It contains time-series data from 1998-99. It is updated continuously. It presents several well-formatted analytical tabulations that include ratio analysis, funds-flow analysis, benchmark and peer comparisons. The software enables querying the database and it incorporates a charting toolkit.

EBSCO Art and Architecture, a database for the study of art and architecture, is designed for use by art scholars, artists, designers, college students and general researchers. It provides easy access to academic journals, magazines, trade publications and books.

EBSCO Business Elite, a resource providing full-text coverage of scholarly business, management and economics journals. It also includes publications covering topics such as accounting, banking, finance, international business, marketing, sales and more.

EBSCO Hospitality and Tourism Complete, a full-text database covering all areas of hospitality and tourism. In addition to full-text journals, it provides magazines, company and country reports, books and newspapers.

GREENR: The Global Reference on the Environment, Energy, and Natural Resources (GREENR) focuses on the physical, social, and economic aspects of environmental issues. Topic, organization, and country portals form research centres around issues covering energy systems, health care, agriculture, climate change, population, and economic development. Portals include authoritative analysis, academic journals, news, case studies, legislation, conference proceedings, primary source documents, statistics, and rich multimedia.

LexisNexis provides solutions designed for professionals in the legal, risk management, corporate, government, law enforcement, accounting, and academic markets. LexisNexis encompasses authoritative legal-publishing brands dating back to the 19th century from the United Kingdom, Canada, the Asia-Pacific region, France, etc.

Manupatra is an online legal research information resource and content aggregator of Indian and International material, linking primary information, secondary material and proprietary analytical content. It is designed for use by legal, educational, finance, corporate, government, law enforcement, intellectual property, and others.

McGraw-Hill Science & Engineering: **AccessScience** is an online resource that contains reference material covering all major scientific disciplines and offers links to primary research material, videos and exclusive animations, plus specially designed curriculum maps for teachers. **AccessEngineering** is an engineering reference tool for professionals, academics, and students and provides access to regularly updated engineering reference information.

SCOPUS is an abstracting and citation database of peer-reviewed literature covering scientific journals, books and conference proceedings. It encompasses world's research output in the fields of science, technology, medicine, social sciences, and arts and humanities.
