

### **Digital Library and Online Search Service**

The Central Library holds about 3 million World e-books; nearly 21,300 e-journals, SCOPUS database, 8900 CD/DVD-ROMs, and high speed access to Internet. The Digital Library facility offers Federated searching of all digital resources held by the library, for accessing, browsing and downloading needed information. Further the users can search the vast information resources available on Internet and World Wide Web such as open access journals, open archives, institutional repositories, and so on. For this purpose 42 terminals are available for users and plans are on for adding 100 more terminals to the facility.
