

User Education Programmes

In University environment there is always change in the population of students, scholars, staff and faculty due to starting of new courses, addition of faculty and staff, new batches of students and so on. So, it is necessary to initiate the new members joining the KL University fraternity to the library, its resources, facilities and services offered. This would not only create interest in them but also awareness of the availability of valuable information and knowledge repositories in the Central Library.

Keeping this in view, the Central Library regularly participates in User Education Programmes and fresher's initiation workshops. Further, when new users approach library, they are initiated to the policies, loan privileges, rules and regulations. These efforts resulted in increased footfall to the library leading to enhanced usage of resources.
