A Report on Clean Campus Programme (MEGA WORK)

Conducted on 19-10-2022 at KLEF

KL Deemed to be University (Koneru Lakshmaiah Education Foundation) **Computer Science Engineering (CSE), National Service Scheme (NSS) Unit- 07** have conducted “**Clean Campus Programme**” on **19-10-2022** at **KLEF**.

Details of the Program:

All the Volunteers of NSS unit-07 gathered in the campus at 9:15 AM along with the respected faculty members. We started the program by cleaning the premises of KLEF campus. We have collected plastic bottles, Biscuit and Chocolate wrappers. Each volunteer have participated actively with the motto Green Campus and each volunteer collected 1.5 kg of waste.

A Green Campus is a place where environmental friendly practices and education combine to promote sustainable and eco-friendly practices. The green campus concept offers an institution an opportunity to take a lead in redefining its environmental concern and develop new paradigms by creating sustainable solutions to environmental and social needs of the inhabitants.

For ideal educational institutional buildings, it is imperative to put in place sustainable environmental management in terms of green cover, solid, liquid and e-waste management, waste reuse and recycling, to cite a few.

Greening the campus is all about turning around wasteful inefficiencies and using conventional sources of energies for its daily energy needs, correct disposal handling, procurement of environment friendly supplies and effective recycling program. Institute has to work out the time bound strategies to implement green campus initiatives. These strategies need to be incorporated into the institutional planning and budgeting processes with the aim of developing a clean and green campus.
