Department of EEE

Report on SPARK-2022 -Techno-cultural Fest of Department

March 9-10, 2022

THE THEME:

People recently heard of major crisis faced by power sector of India is Shortage of power production due to shortage in coal. Reasons such as excessive rainfall, international price rise, Covid-19 pandemic, less production, transportation issues including freight rates and high consumption were cited as the reason for the coal shortage. In short, power generation has taken a hit and people living in the cities emerged as the sufferers. Increasing living standards have made yesterday's luxury into today's comfort and that may be tomorrow's basic need. Per capita electrical energy consumption is increasing tremendously with highest in Bahrain around 18,000 kWh and on world average of 3000 kWh.

Nowadays, it is found that companies advertise their products by promoting their environmentally – friendly behaviour. It does not matter whether it is on TV or on banner; the message of “go green” is almost always used. But why green? Green is not simply a color. Going green is a way of making changes in the lifestyle of some organizations as well as the society also. This implies bringing in some changes which are friendlier towards the environment. It is to note that the mere truth while doing every simple thing impacting on the planet – good or bad, an individual has all the right to make choices, thus the later can control the impact generated. Going green also means a more sustainable world. In this context the engineers have stood up for the cause. Mechanical and chemical engineers are making better storages, computer and electronic engineers making smarter equipment and we the electrical engineers could only take up the challenge of integrating Giga watts of power into the conventional grid.

Yet again Yes!! the world is waiting for smart electrical engineers who could save it from power crisis. The coming years are going to be a great opportunity for electrical engineers, but to the surprise there is downfall in admissions into electrical engineering in fancy of IT industry, but I believe as a sine wave sees a crest soon after a trough so is the right time for electrical engineering to see its peak in near future. This urged us to have the theme for current edition of SPARK to be GO GREEN & GO RENEWABLE to enlighten the students on challenges and opportunities in migrating to renewable power and lead the world and overcome the crisis being faced.

PICTURE: Chief Guest Shri Kadiyam Chakravarthy looking after the ideas of young minds as a part of Project Expo and giving them the great reviews in order to implement further in support to the development of the nation.

PICTURE: The most appreciable moment of SPARK2022 the students of ZPHS School, Mangalgiiri actively involved in the project expo and few students even displayed their ideas in the expo.

PHOTO: Dr. Praveen Damacharla, Mr. Ambula Gopi Raja, Mr. Ravithej Dantala, Mr. Rahamthulla Noorbhasha, Mr.NagaBabu Kogant clearing the students questions.

We were pleasure to have our beloved alumini who graduated and began their own startups and are growing with immense success to the greater heights that established themselves already in the outside world. Our prominent alumini are: . . .

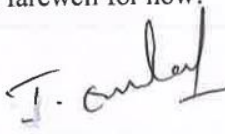

Dr. Praveen Damacharla, Mr. Ambula Gopi Raja, Mr. Ravithej Dantala, Mr. Rahamthulla Noorbhasha, Mr.NagaBabu Koganti. They shared their experiences, ups and downs faced during their way to success. Finally that was a great time where we heard of many stories of success and was those words are really inspirational.

It is such a great time where students gathered the photos of teachers and made them surprise. Real smile-of every teacher is observed at that moment. It might be one of the most memorable moment for the teachers. Prize distribution for the Games conducted as a part of Spark 2022. Team Cricket 2nd years stood first. It is such a great appreciation for the students.
