## House Hold Survey-Analysis of Survey Data

# Household Survey

**Details of the Event:**

**Name of the Event** :House hold survey  
**Date of the Event** : 05-11-2022  
**Venue** : Mellampudi  
**No.of Participants** :**Students:94Faculty/Staff:03**

**Objective:**

The objective of the household survey conducted on November 5, 2022, in Mellampudi Village was to gather detailed social and demographic statistics. This survey aimed to collect comprehensive data on the village population, including age, gender, education levels, employment status, income, health conditions, housing conditions, and access to basic amenities and government services. By obtaining this information, the survey sought to understand the community's socio-economic profile, identify their needs and challenges, and provide a foundation for targeted development initiatives. The ultimate goal was to use the data to improve planning and policy-making, enhance resource allocation, and support the overall well-being and development of the villagers.

**Description:**

On November 5, 2022, KL Deemed to be University NSS Unit-09 (KL School of Architecture) conducted a household survey in Mellampudi Village. Household surveys are a vital source of social and demographic statistics for the village. While housing censuses also provide important data, household sample surveys can investigate almost any population-based subject, offering a flexible and powerful alternative for understanding social phenomena. These surveys help identify the basic needs and daily challenges faced by each household. Historically, these surveys were conducted manually with field scientists collecting data door-to-door, but modern approaches have streamlined this process.

The survey had two primary components to ensure accurate information: the Household Roster and the Questionnaire.

Household Roster: This section gathered specific information about each household.

Relationship to the head of the household

Age and gender of each member

Education level and literacy

Number of children and adults

Educational status of children

Age groups of household members

Questionnaire: This section captured detailed individual information.

Identification of the head of the household

Marital status of household members

Personal information about marriage, children, and other aspects

The initiative was cherished and well-planned by Programme Officer Ar. Senthil Kumar P. The NSS volunteers, supervised by faculty members Ar. Senthil Kumar P. and Ar. Harshitha, along with coordinator Mr. P. Suresh, actively participated in this activity. The efforts of the volunteers, all 4th-year students from the Architecture department, and the faculty members were appreciated by Ar. V. Selvaraj, Principal of the School of Architecture; Ar. A. Priya, HoD of the School of Architecture; Mr. P. Srikanth Reddy, Coordinator of KLEF NSS Cell; and Dr. Ch. Hanumantha Rao, Dean of Student Affairs.

**Outcome:** The household survey conducted by KL Deemed to be University NSS Unit-09 (KL School of Architecture) on November 5, 2022, in Mellampudi Village achieved its objective of gathering comprehensive social and demographic statistics. The survey helped understand the basic needs and challenges faced by the households, as well as track living standards, demographics, and socio-economic aspects of each household.

The survey was structured into two components: the household roster and the questionnaire. The household roster collected specific information such as relationships to the head of the household, the age and gender of each member, education levels, and the number of children and adults in the household. The questionnaire gathered detailed individual information, including marital status, personal life details, marriage, and children.

**Impact on Society :**

The household survey in Mellampudi Village provided crucial insights into living conditions and socio-economic challenges, enabling more effective community development planning. It raised awareness among villagers and fostered active participation in development programs. The initiative strengthened the bond between the university and the village, promoting trust and collaboration.
