Promoting Awareness on Seasonal Diseases

DetailsoftheEvent

Date of the Event :18-03-2023
Name of the Event :Awareness program against Seasonal Diseases
Venue of the Event :Chirravuru
No. of Participants :Students: 95, No.ofFaculty:4
Beneficiaries :512

Objective:

The objective of the "Awareness program against Seasonal Diseases" organized by the Department of Computer Science and Information Technology (CSIT) Engineering at KL Deemed to be University was to educate and raise awareness among the villagers of Chirravur about the seasonal diseases that occur during the summer and how to protect themselves against them. The program aimed to promote personal and environmental cleanliness as preventive measures against diseases spread by mosquitoes and other factors.

Description:

On March 18, 2023, an awareness program on seasonal diseases was organized in Chirravur village, Andhra Pradesh, under the National Service Scheme (NSS) of KL Deemed University. Necessary arrangements were made with permission from the Chirravur village secretariat officer. Volunteers, led by the university's NSS Program Coordinator Mr. P. Srikanth Reddy, arrived in Chirravur at 09:50 AM and were divided into groups under the guidance of Program Officer Mr. K. Srikanth, CEA Coordinator Mr. P. Suresh, and Mr. GVKP Chandrasekhar.

The volunteers were trained on seasonal diseases and preventive measures, and they visited each household to educate villagers about disease prevention. The program emphasized personal cleanliness, proper waste disposal, and the removal of mosquito breeding sites like stagnant water, coconut shells, and old tires. The use of mosquito nets and covering water containers were also highlighted.

Faculty, students, and staff from KL Deemed University actively participated, sharing knowledge on mosquito-borne diseases and prevention. The organizers expressed satisfaction in educating rural communities about environmental cleanliness and the positive impact of such service programs.

Outcome:

The "Awareness Program Against Seasonal Diseases" yielded several positive outcomes. Firstly, the villagers of Chirravur were informed about the common seasonal diseases during the summer and learned how to protect themselves. The program significantly raised awareness about the importance of personal and environmental cleanliness in disease prevention.

Volunteers conducted door-to-door visits, ensuring that every household received essential information. By providing guidance on preventive measures and promoting good hygiene practices, the program aimed to reduce the incidence of seasonal diseases and improve the community's overall health.

The participation of KL Deemed University faculty, students, and staff not only benefited the villagers but also offered the participants valuable experience and a sense of fulfillment. This engagement could be advantageous for their future job interviews.

Impact on Society:

The "Awareness Program Against Seasonal Diseases" positively impacted society by educating the Chirravuru villagers on the importance of personal and environmental hygiene, thereby reducing the incidence of seasonal diseases. It also fostered a sense of community responsibility and proactive health practices, contributing to improved overall health and well-being.
