FROM
CHANCELLOR'S DESK

In 2023, universities must prioritise a diverse range of extracurricular activities that foster personal and professional growth while providing a solid academic foundation. The importance of extracurricular activities stems from their ability to break the monotony of classroom learning and provide opportunities for exploration and development.

Universities should focus on Equpping the students with essential skills, in order to pave way for an impressive career path that makes the individuals capable of making a positive impact on the world.
