*Overall Revision Percentage= sum of percentage of Course Outcome revision. Any revision to the tune of 25% or above is considered as a new course. In all other cases the course code is changed and the course is considered as a revised course.

Each CO revision percentage is calculated based on the extent to which the outcome has been revised through addition or deletion of topics.

Percentage of Syllabus Revision=40 %

Percentage of Courses focusing on Employability= 25%

Percentage of Courses focusing on Entrepreneurship= 1%

Percentage of Courses focusing on Skill Development = 7%

Course Code: 23BA1204

Course Title: Macro Economics

Course Objective: Explore models that explain economic behavior, such as the aggregate supply and demand model, IS-LM model, and AD-AS framework and the roles of government and central banks in managing the economy through fiscal policies (taxing and spending) and monetary policies (interest rates and money supply).

Course Rationale: Macroeconomics focuses on the overall performance and behavior of an economy, providing insights into aggregate phenomena such as economic growth, unemployment, inflation, and the overall stability of financial markets. It also provides students with a broader perspective on economic phenomena, equipping them with the analytical tools necessary to navigate the complexities of the economy.

ANNEXURE 3

Department of Arts Course Syllabus 2023-2024

23BA1101- MICROECONOMICS

L-T-P-S: 4-1-0-0

Credits: 5

Prerequisite: Nil

CO#	Course Outcome (CO)	POs	BTL
CO1	To understand the nature, scope, and subject matter of economics and microeconomics.	PO1	2
CO2	To understand the concepts of supply, production, and cost.	PO2	2
CO3	Understanding the firm's behavior in different market structure and its role in determining those structures.	PO12	3
CO4	Analyze the factor pricing in the economy and also know theories of factor pricing.	PO10	4

CO1: Theory of Consumer Behaviour

Nature, Definition and Scope of Economics-Methodology in Economics- Micro economics- Scope- Basic concepts in Micro Economics- Micro- Macro distinction-Scarcity and Choice as an Economic Problem-Utility Analysis-Cardinal and Ordinal Utility-Law of Diminishing Utility-Law of Equi-marginal Utility-Nature of Demand-Law of Demand-Movements and Shifts in Demand Curve-Elasticity of Demand-Price, Income and Cross Elasticity-Price Line-Indifference Curve- Law of supply-Determinants of supply-Movement and Shifts in Supply Curves-Elasticity of supply Consumer Surplus-Consumer's Equilibrium.

CO2: Theory of Production and Cost-Concept of Production Function-Long Run and Short Run Production-Isoquant-Law of Variable Proportion-Law of Return to Scale- Concepts of Cost-Money, Accounting, Real, Opportunity, Economic, Implicit and Explicit, Short Run, Long Run, Fixed and Variable Costs-Concepts of Total, Average and Marginal Costs. Relationship between Average and Marginal Costs Curves in Short run and Long run- Concepts of revenue-AR, MR, TR; Break-even point.

CO3: Market Structure-Market Structure-Features and Types of Markets-Perfect and Imperfect Markets-Perfect Competition-Price and Output Determination-Equilibrium of Firm and Industry Under Perfect Competition-Monopoly- Price and Output Determination Under Monopoly-Monopolistic Competition-Monopolistic Competition Price and Output Determination-Oligopoly-Kinked Demand Curve of Oligopoly.

CO4: Factor Pricing - Distribution-Marginal Productivity Theory of Distribution-Rent-Scarcity Rent and Quasi Rent-Ricardian Theory of Rent-Types of Wage- Subsistence Theory-Wage Fund Theory-Theories of interest: Classical, Neoclassical and Keynesian theories. Theories of profit: Dynamic theory, Risk and Uncertainty theory, Innovation theory.

23BA3218-COMPUTER APPLICATION IN ECONOMIC ANALYSIS

L-T-P-S: 4-1-0-0

Credits: 5

Prerequisite: Nil

CO#	Course Outcome (CO)	PO/PSO	BTL
CO1	The students will be able to have a basic understanding of personal computers and their operations.	PO1	2
CO2	The students will be able to know the various software and hardware, various security issues.	PO2	2
CO3	The students will be able to apply the Statistical Processing Techniques and Methods	PO3	3
CO4	familiarize students with complete fundamentals and the packages commonly used in computing software.	PO4	4

Syllabus

CO1: Introduction to Computer and Peripherals: Computer components-CPU, input-output devices, key board, mouse and scanner, video display, printers and plotters, data storage and retrieval, hard disk, floppy disk and CD ROM; Types of computer and their applications; MS Excel: Excel Basics – Introduction – Menus, Commands, Toolbars and their Icons – Data Sort – Functions – Excel Exercises.

CO2: Data processing, Techniques and Algorithms: Concept of data, record and files; types of data and data structures, data analysis, file handling and operations like opening, appending and cascading, closing and attribute control: data operations; Algorithms like sorting, merging, joining and bifurcation; data base concepts and operations on data base; DBMS and RDBMS.

CO3: Statistical Processing Techniques and Methods: Series, group, tables, graph and objects; time and frequency series; regression methods and techniques: regression analysis; data validation; trends and cyclical forecasting; system modelling and description; system equation; specification; error and correction strategies; statistical modelling and descriptive statistics; distribution functions; regression statistics.

CO4: Economic Forecasting: Computers help to develop complex forecasting models. The prediction of GDP, population, Output etc may be made accurately and reliably with the help of computers. Trading (E-Commerce or E-Business) The growth of internet facilitated the massive growth in online trading. For eg., Amazon, Flipkart etc., Preparation of tables, analysis of data with the help of statistical software also possible and easy. For eg., SPSS, STATA, etc., They further provide instant access to large number of sources from which literature, articles, research papers, reports can be downloaded. Reports Computers help to prepare and present research reports, Research Computers help the researchers to complete their research works. Collection of research materials, data, analysis, storing of data and for preparation of reports

23AUBA05-HISTORY AND CULTURE OF ANDHRA PRADESH

L-T-P-S: 4-0-0-0

Credits: 0

Prerequisite: Nil

CO#	Course Outcome (CO)	PO/PSO	BTL
CO1	To understand the brief social, economic and cultural history of Andhra Pradesh.	PO1	2
CO2	The student will get the knowledge about Social Reform Role of Christian Missionaries in Andhra Pradesh.	PO2	2
CO3	Gain Knowledge in the concept of History of Andhra Pradesh	PO1	2
CO4	Acquire Knowledge of prominent leaders leading to formation of Andhra State.	PO 2	2

Syllabus:

A brief social, economic and cultural history from Satavahanas to the Vijayanagara period; Socio-Cultural life, Religion- Telugu Script and Language, Literature, Art and Architecture; Contribution of Qutubshah is to

ANNEXURE 4

23BA1102-MATHEMATICAL METHODS IN ECONOMICS

L-T-P-S: 4-1-0-0

Credits: 5

Prerequisite: Nil

CO#	Course Outcome (CO)	PO/PSO	BTL
CO1	The students will be able to Acquire knowledge in building economic models by using functional forms and derive maxima and minima of economic functions in single variable case.	PO1	2
CO2	Examine unconstrained and constrained optimization in simple economic problems and calculation of consumer's surplus and producer's surplus.	PO2	2
CO3	The students will be able to solve the simultaneous equations through Cramer's rule and matrix inversion method and identify basic properties of determinants and vectors.	PO3	3
CO4	The students will be able to Discuss the concept linear programming problem and its solution by graphical method.	PO4	4

Syllabus

CO1: Mathematical Methods-1: Concept of function and types of functions; Limit, continuity and derivative; Rules of differentiation; Interpretation of revenue, cost, demand, supply function; Elasticities and their types; Multivariable functions; Concept and types of production functions; Problems of Maxima and Minima in single Variable Case. **CO2: Mathematical Methods 2:** Rules of partial differentiation and interpretation of partial derivatives; Problems of maxima and minima in single and multivariable functions; Unconstrained and constrained optimization in simple economic problems; Simple problems in market equilibrium; Concept of integration; Simple rules of integration; Application to consumer's surplus and producer's surplus; Growth rates and simple properties of time path of continuous variables. **CO3: Mathematical Methods-3:** Determinants and their basic properties; Solution of simultaneous equations through Cramer's rule; Concept of matrix-their types, simple operations on matrices, matrix inversion and rank of a matrix; Concept of vector-its properties.

CO4: Mathematical Methods-4: Introduction to input-output analysis-Difference equations – solution of first order and second order difference equations; Applications in trade cycle models; Growth models and lagged market equilibrium models.

23BA1205- STATISTICS METHODS IN ECONOMICS

L-T-P-S: 4-1-0-0

Credits: 5

Prerequisite: Nil

CO#	Course Outcome (CO)	PO/PSO	BTL
CO1	Explore the knowledge relating to the calculation of simple correlation and regression models and their assumptions and limitations.	PO1	2
CO2	Learn the calculation of partial and multiple correlation coefficients and fitting the multiple regression equation.	PO2	2
CO3	The students will be able to Distinguish between sampling methods and population survey method and study the random and non-random sampling methods.	PO3	3
CO4	The students will be able to analyse the data by using correlation and regression.	PO4	4

Syllabus

Introduction and Overview

Introduction to statistics – Definition, scope, importance and limitations of statistics – Primary and Secondary data. Subject-matter - the distinction between population and sample. Representation of data- graphical (line diagram, bar diagram, pie chart) and tabular method. Frequency Distribution

Descriptive Statistics

Measures of central tendency (arithmetic mean, geometric mean, harmonic mean, median and mode, and their properties, Quartiles, Deciles and Percentiles, Dispersion (range, quartile deviation, mean deviation, standard deviation, coefficient of variation, coefficient of mean deviation, coefficient of quartile deviation, Lorenz curve and Gini coefficient, Moments, Skewness and Kurtosis (definition, computation, Correlation and Regression (definition, computation, properties)

Sampling statistics:

Basic concept of sampling- random and non-random sampling; simple random; stratified random and P.P.S. Sampling; Concept of an estimator and its sampling distribution; Desirable properties of an estimator.

Correlation and Regression

Correlation and regression – Meaning, definition and uses of correlation – Types of correlation – Karl Pearson's correlation coefficient – Spearman's Rank Correlation – Regression Equations – Utility of regression analysis.

23BA2207-BASIC ECONOMETRICS

L-T-P-S: 4-1-0-0

Credits: 5

Prerequisite: Nil

CO#	Course Outcome (CO)	PO/PSO	BTL
CO1	Students will be able to understand the core concepts and techniques in econometrics	PO1	2
CO2	Students will be able to understand as well as apply the linear regression model.	PO2	2
CO3	The students will be able to have In-depth understanding and application of simple as well as multiple linear regression models.	PO3	3
CO4	The students will be able to analyse the data by using correlation and regression.	PO4	4

Syllabus

CO1: The nature of Econometrics and Economic Data

Introduction, Model Specification and applied research, the role of data in model specification, The Structure of Economic Data, Steps in Empirical Analysis, Causality and the Notation of Ceteris Paribus in Econometrics, etc. **CO2: The Simple Regression Model**-Introduction, Definition of the Simple regression Model, Deriving the Ordinary Least Squares Estimates, Properties of OLS on Any Sample of Data, Units of Measurement and Functional Forms, Expected Values and the Variances of the OLS, Regression through the Origin and Regression on a Constant, Regression with Graphics, Outliers, Leverage and Influence, Transformation towards Linearity, Summary. **CO3: Multiple Regression Analysis**- Estimation; Introduction, Motivation for Multiple Regression, Mechanics and Interpretation of Ordinary least Squares, The Expected Values of OLS Estimators, The Variance of the OLS Estimators, Efficiency of OLS: The Gauss-Markov Theorem, Fragility Analysis, Summary. **CO 4: Multiple Regression Analysis**-Inference; Introduction, Sampling Distribution of the OLS Estimators, Testing Hypotheses about a Single Population parameter: The t Test, Confidence Intervals, Testing Hypotheses about a Single Linear Combination of the Parameters, Testing Multiple Linear Restrictions: The F Test, Relationship between F and t Statistics, The R-Squared Form of the F Statistic, Computing p-Values for F Tests, The F Statistic for Overall Significance of a Regression, Testing General Linear Restrictions; Reporting Regression Results, Summary.

23BA2208- ECONOMICS OF GROWTH AND DEVELOPMENT

L-T-P-S: 4-1-0-0

Credits: 5

Prerequisite: Nil

CO#	Course Outcome (CO)	PO/PSO	BTL
CO1	The students will be able to evaluate the fundamental economic concepts and theories of developmental economics.	PO1	2
CO2	Analyze the developmental approaches, policies, and the issues related to the developmental problems that the world community faces in day to day life.	PO2	2
CO3	The students will be able to Examine the current pattern of development models and relate to the real macroeconomic problems.	PO3	3
CO4	Analyze of modern economic growth and development, and environmental problems and issues.	PO4	4

CO1: Theories of Development: Development and Underdevelopment; Contributions of Classical economists to the theory of development; Karl Marx and development of capitalistic economy; Schumpeter and capitalistic development; Structural view of development.

CO2: Approaches to Development: Measures of Poverty and inequality; Measuring development. Partial theories of growth and development- Circular causation; Big push theory; Balance and unbalance growth; Technical Dualism; Dependency theory of development.

CO3: Economic Growth Models: Harrod and Domar growth model; Neo-classical growth models: Solow, Meade, and Mrs. Joan Robinson; Cambridge criticism of Neo-classical analysis of growth. Population as limits to growth and as ultimate source, Population, poverty and environment linkages.

CO4: Technological Change and Growth Models: Production Function Approach to Economic Growth and Growth Accounting; Golden rule of accumulation; Endogenous growth models (Romer, Lucas, AK model)

Introduction to Public Finance- Public Finance- Nature and scope- Public and Private finance- Public Goods and Externalities- Principal of Maximum Social Advantage. Theory of Public Finance. Overview of Fiscal Functions, Tools of Normative Analysis, Pareto Efficiency, Equity and the Social Welfare, Market Failure, Public Good and Externalities, Elementary Theories of Product and Factor Taxation (Excess Burden and Incidence).

Public Expenditure- Principles of Public Expenditure-Classification-Causes and Effects- Canons of Public Expenditure-Role in Developing Countries. Public Expenditure Theory Pure theory of public expenditure- Empirical evidence on public expenditure theories. Public Sector Pricing- Pricing of Public Utilities. Public expenditure management and control, Concept, measurement and magnitude of subsidies. Social infrastructure and financing of human development. Growth, nature and composition of public expenditure in India. Sustainability issues of Centre and State expenditure in India, Issues related to subsidies in India, Social Security and State level pension reforms in India.

Public Revenue & Tax Policy Issues in India- Public Revenue- Objectives- sources of Taxation- Types, Incidence and Effects of Taxation- role in developing economy- Indian Tax System: An assessment, Practical Issues of Tax reforms in India, An introduction to Value Added Tax, Value Added Tax: Design, Issues and Options. An introduction to MODVAT, CENVAT and Goods and Services Tax (GST), Issues in the taxation of Services in India. Recent Tax Policy-Taxable Capacity: Absolute and Relative Taxable Capacity. Factor Determining Taxable Capacity - Limits to Taxable Capacity.

Public Debt- Public Debt- Sources- Effects- crowding out Effect- Government Budgeting-classification- Concepts of Budget Deficits - Indian Union Budget. Measurement and macro-economic impact of deficits- alternative paradigms. The concept of budget. Fiscal deficit and interest rates: Analytical and empirical issues. Public debt burden and intergenerational equity. Issues related to public debt sustainability. Trends and developments in Indian Fiscal Policy. Recent experience with stabilization functions of India government. Fiscal Responsibility and Budget Management Act: An Evaluation. Trends in and Financing pattern of deficits in India and its macro-economic implications.

23SDBA04 - WORLD PHYSICAL GEOGRAPHY

L-T-P-S: 1-0-0-4

Credits: 2

Prerequisite: Nil

CO#	Course Outcome (CO)	PO/PSO	BTL
CO1	To understand the fundamental concepts of spatial interaction and diffusion, which explain how human activities are influenced by the concept of distance	PO1	2
CO2	To make the students understand the basic concepts of landforms as well as geomorphology	PO2	2
CO3	To understand the atmosphere and climate are a critical part of the earth system, and climatic variability and change are central to the issue of current and future global environmental change.	PO1	2
CO4	To make understand the physical principles and processes governing the circulation and characteristics of oceanography	PO 2	2

Syllabus:

Geomorphology: Definition, nature and scope of geomorphology; Factors controlling landform development; endogenetic and exogenetic forces; Origin and evolution of the earth's crust; Fundamentals of geomagnetism; Physical conditions of the earth's interior; Geosynclines; Continental drift; Isostasy; Plate tectonics; Recent views on mountain building; Volcanicity; Earthquakes and Tsunamis, Weathering Process: Physical, Chemical and Biological; Mass wasting

23BA3113-AGRICULTURAL ECONOMICS

L-T-P-S: 4-1-0-0

Credits: 5

Prerequisite: Nil

CO#	Course Outcome (CO)	PO/PSO	BTL
CO1	Highlight interdependence between agriculture and industry and the rest of the economy with empirical evidences and theoretical models.	PO1	
CO2	Students will be able to Identify the extent of diversification of rural activities and related issues and problems in the country.	PO2	
CO3	Students will be able to acquire skill of estimation of farm budgeting, revenue, resource use efficiency in agriculture	PO3	
CO4	The students will be able to analyse the agriculture production and productivity.	PO4	

Syllabus

CO1: Agriculture and Economic Development: Nature of agricultural and rural economics; Traditional agriculture and its modernization; 28 Role of agriculture in economic development; Interdependence between agriculture and industry-some empirical evidence; Models of interaction between agriculture and the rest of the

23BA3115-INDUSTRIAL ECONOMICS

L-T-P-S: 4-1-0-0

Credits: 5

Prerequisite: Nil

CO#	Course Outcome (CO)	PO/PSO	BTL
CO1	It describes the industrialization in India since independence.	PO1	2
CO2	Students will be able to familiarize students with financial institutions financing industries.	PO2	2
CO3	Students will be able to examine different industrial policies and issues in India.	PO3	3
CO4	The students will be able to analyse the Industrial economic concentration and remedial measures in India.	PO4	4

Syllabus

CO1: Industrialisation: Industrialisation-rational objectives, strategies and policies; Industrialisation in India; Rural industrialisation-issues and problems; Industrial process during plan periods.

CO2: Large and small scale Industries: Large and small scale industries-role, performance and problems; Institutional finance-role, nature, volume and types; IDB, IFCI, SFCs, SIDC, Commercial banks etc.
