Objective:

To perform the blood grouping test by the KLEF_YRC team on 22 November 2023 in Vijayawada.

Description:

Participants performed blood grouping test Understanding blood groups is vital for various medical procedures, especially blood transfusions. Transfusing incompatible blood can lead to severe reactions, which can be fatal. Therefore, before any transfusion, both the donor and the recipient's blood types are tested to ensure compatibility. Blood grouping is crucial for a variety of medical reasons. Here's why it's so important, Blood transfusions can save lives, but they can also be dangerous if the blood groups don't match. Mismatched transfusions can cause serious immune reactions and even be fatal. Knowing your blood group ensures that you receive compatible blood if needed. Medical Procedures: Certain medical procedures, such as surgeries, may involve blood loss and necessitate blood transfusions. Knowing the blood group in advance ensures that the correct blood type is readily available. Organ Transplants: Like blood transfusions, organ transplants require matching blood groups to reduce the risk of rejection. Blood group compatibility helps in the success of organ transplants. The creativity and passion of the attendees shone through, creating a compelling message for all who witnessed.

Procedure of the Event:

1. The KLEF_NSS team arrived at around 10 am.
2. They commenced the event by performing a door-to-door Blood Grouping test.
3. After performing grouping they had written blood group on designed cards and given to the villagers.

Outcome of the event:

1. The event successfully performed Blood Grouping to the villagers
2. The KLEF_YRC team effectively organized the program, ensuring that the main objective of blood grouping is a fundamental concept in medicine that ensures the safe administration of blood and blood products
3. The volunteers demonstrated professionalism and friendliness throughout the event.
4. Locals of the Village actively participated and expressed interest in blood grouping tests.

In a moving to conclusion, all attendees performed blood grouping tests. Students of KL University actively participated and expressed "To ensure that everyone who needs a transfusion and who is donating blood to others need to know about their blood group.

We extend our heartfelt gratitude to everyone who participated, contributed, and supported this vital cause. Together, we are making a tangible difference in our community.
