Objective:

The KLEF_YRC team conducted a campaign at KLEF on 30 November 2023 to raise Awareness of communicable and non-communicable diseases.

Description:

Communicable and non-communicable diseases pose significant health challenges globally. Communicable diseases, such as influenza, tuberculosis, and COVID-19, are caused by infectious agents and spread from person to person. Non-communicable diseases, including heart disease, stroke, cancer, and diabetes, are often linked to lifestyle factors like poor diet, physical inactivity, and tobacco use. Both types of diseases have far-reaching consequences, impacting individuals, families, and communities. Effective prevention and control strategies, including vaccination, hygiene practices, healthy lifestyle choices, and early detection and treatment, are crucial to address these health issues and improving global health outcomes.

Procedure of the Event:

1. The KLEF_YRC team gathered in the SAC hall by 9:30 am.
2. They commenced the event by explaining the importance and purpose of communicable and non-communicable diseases to the students and staff in the university.
3. Organized by the YRC volunteers from KL University

Outcome of the event:

1. The event successfully raised communicable and non-communicable diseases the students and participants.
2. The KLEF_YRC team effectively organized the program, ensuring that the main objective of creating awareness was achieved.
3. The volunteers demonstrated professionalism and friendliness throughout the event.

The event on communicable and non-communicable diseases proved to be highly successful, achieving the following outcomes:

- **Increased Awareness:** Participants gained a comprehensive understanding of the types, causes, and prevention strategies for both communicable and non-communicable diseases.
- **Enhanced Knowledge:** Attendees learned about the importance of healthy lifestyle choices, such as balanced diets, regular exercise, and avoiding tobacco and excessive alcohol consumption, in preventing non-communicable diseases.
- **Promoted Preventive Measures:** The event emphasized the significance of vaccination, regular health check-ups, and early detection in combating communicable diseases.
- **Encouraged Community Engagement:** Participants were motivated to adopt healthier habits and promote awareness within their communities.
- **Positive Feedback:** The event received positive feedback from attendees, highlighting the informative and engaging nature of the presentations and discussions.

Overall, the event contributed to empowering individuals to make informed decisions about their health and take proactive steps to prevent both communicable and non-communicable diseases

We extend our heartfelt gratitude to everyone who participated, contributed, and supported this vital cause. Together, we are making a tangible difference in our community.
